CSBA AI Taskforce

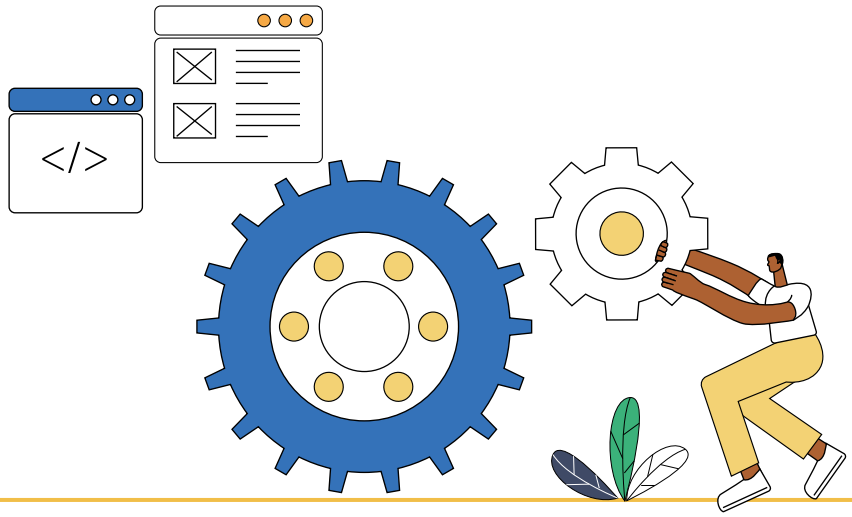
A NOTE FROM AI TASKFORCE CHAIR AND PACIFIC UNION ESD BOARD MEMBER SUSAN MARKARIAN

As the Chair of CSBA's AI Taskforce, I am honored to present these four publications, developed by taskforce members, which reflect our collective efforts to navigate the ever-evolving landscape of artificial intelligence. Over the past two years, our team has diligently explored the transformative potential of AI technologies while addressing the ethical, social and economic implications they entail.

This series of publications serves as a comprehensive resource for board members, educators, policymakers and the wider community. They encapsulate our best thinking gleaned from discussions with experts across various AI-related fields. Our aim is to foster a nuanced understanding of AI's capabilities and limitations, ultimately guiding responsible innovation and deployment. As we stand at the crossroads of technology and society, it is imperative that we harness AI for the greater good.

Our taskforce's commitment is to ensure that AI development aligns with the values of transparency, accountability and inclusivity. We invite you to use these publications with your board and join us in shaping a future where AI serves preK-12 students, enhances our quality of life and addresses the challenges we face in public education. Together, let us embark on this journey toward a responsible, safe and equitable AI-driven future.

I hope you find these resources valuable and please visit the AI Taskforce webpages to learn more about what board members need to know about AI: www.csba.org/AI.

Sincerely,


Susan Markarian
AI Taskforce Chair and Pacific Union ESD board member
