

## CSBA's PRACTI-CAL

Putting California's children first through industry leading consulting and Medi-Cal billing services

CSBA's Practi-Cal provides local educational agencies (LEAs) with superior fee-for-service Medi-Cal billing claims processing and MAA consulting services. Practi-Cal processes claims for millions of dollars and ensures program compliance so that clients keep it. Read on to discover why Practi-Cal is the right choice for your LEA.

### LEA PROGRAM OVERVIEW

School districts today are growing in the amount of individual education plan (IEP) related health services provided to their students. The California Department of Health Care Services, Medi-Cal Billing Option Program, allows districts to be reimbursed for a portion of the cost of providing some services to an eligible student population. Participating in these programs has both direct and indirect benefits to schools, providers and above all, schoolchildren. Such IEP reimbursable services include assessments, treatments and targeted case management.

Practi-Cal offers the most comprehensive LEA Billing Option Program services available to California school districts and county offices of education. Practi-Cal's full spectrum of LEA Billing Option Program support includes data collection, transmission, eligibility verification and claims reconciliation. Experienced consultants work with you to create the necessary billing forms that can be accessed from an online module.

"CSBA's Practi-Cal staff is highly professional and responsive to our needs. Their work has resulted in the capture of over \$700,000 in revenues over the past three years. This has helped bring special education programs to a whole new level... but, Practi-Cal is just as focused on ensuring our district's compliance with program requirements as they are on generating revenue, and that has provided district leadership a real sense of security."
